Yale MBA candidate and AI product/operator with SVB venture banking experience, full-time restaurant operations leadership, and hands-on AI products across healthcare workflow, real-time voice ordering, and MBA recruiting prep. Available now for full-time roles and relocation, with preference for SF, NYC, and the DC area.

Experience

FormIQ - Co-Founder & Tech Lead

2024-Present

- Built and tested an AI workflow automation platform with Yale Orthopedics, converting thousands of healthcare documents into classified, routed, review-ready cases with human review and audit trails.
- Modeled 10,400 annual admin hours of potential time savings for one department; one-department internal value model suggests about \$500K annual operational opportunity.
- Owned product specifications, workflow UX, roadmap, and enterprise-review materials through small pilot/proof-site work, executive demos with Yale stakeholders, and due-diligence conversations.
- Architected full-stack capabilities across Rust, Python/FastAPI, React/TypeScript, PostgreSQL, authentication, Docker/Helm, observability, and role-based workflow controls.

Silicon Valley Bank - Associate - ADP, Global Fund Banking, Venture Capital

Jan 2022-Jul 2024

- Managed a roughly \$2B PE/VC client portfolio, supporting underwriting, credit approvals, borrower/fund-level analysis, covenant compliance, default review, and legal-document analysis.
- Helped redesign covenant intake from email/manual associate processing into a simple client-facing online form workflow, reducing manual portfolio-management workload by an estimated 80 team-hours per week.
- Originated \$25M+ in startup banking opportunities by sponsoring and attending Silicon Valley startup events, evangelizing SVB's value proposition, and routing founders/operators to relevant banking teams.

Pizza Boli's - Assistant Manager; Manager / Advisor

Apr 2017-Jan 2022

- Worked full time in family restaurant operations, managing roughly 20 employees across 10 drivers, 8 cooks, and 2 order takers.
- Reduced core food input costs by about 8% across cheese, dough, and sauce through supplier negotiation and vendor changes.
- Redesigned phone-order coverage with VOIP/offshore staffing in Pakistan, reducing call bottlenecks and improving in-store order-taker productivity.

Selected AI Builds

- Orderer.io (Founder, Aug 2025-Present): live real-time phone AI ordering for restaurants with streaming audio, barge-in, order capture, transcripts, SMS/payment links, and web/admin workflows; tested with hundreds of calls for a family restaurant use case.
- ConsultX (Founder, Dec 2024-Aug 2025): voice/RAG consulting interview-prep platform using roughly 500 public case-prep resources, structured grading, feedback, drills, quizzes, and hundreds of mock interview sessions for friends/users.

Education

Yale School of Management - MBA, expected 2026; GRE 331/340; Judith Bernstein Memorial Award

University of Maryland - MS Finance, 2021; BS Information Science: Data Science/Machine Learning, 2020

Skills

AI/Product: LLM workflows, prompt engineering, structured extraction, RAG, real-time voice AI, human-in-the-loop systems, workflow automation, product operations, roadmap planning. **Finance/Risk:** credit underwriting, portfolio monitoring, covenant compliance, financial analysis, VC/PE banking. **Technical:** Rust, Python/FastAPI, React, TypeScript, PostgreSQL, Docker, observability.
